DELIVERING QUALITY KEY MANAGEMENT SOLUTIONS SINCE 1986...

ABOUT US
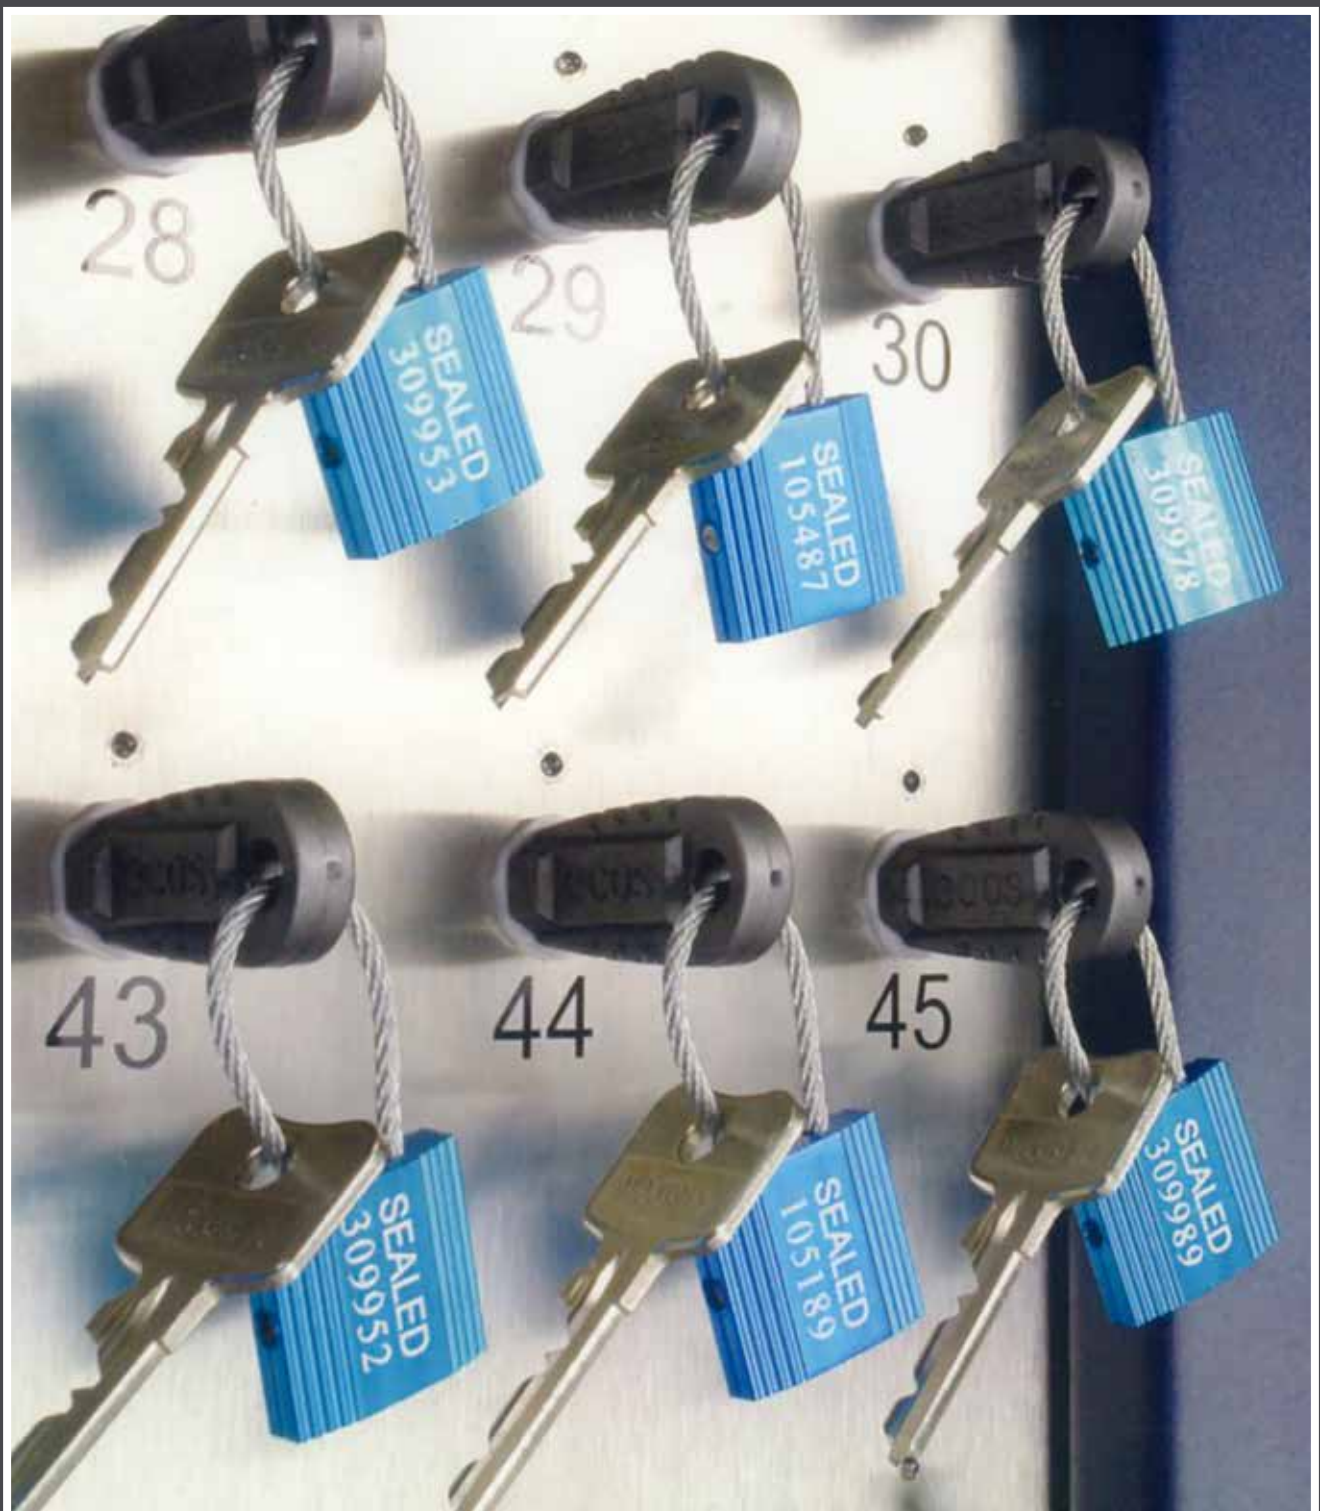

KEY·TAG AUSTRALASIA trading as Autotag Australia Pty Ltd, has been in business since 1989 over which time, has maintained a loyal customer base, repeatedly buying our unique key tags and other associated products.

We are the sole distributor of products from Autotag UK, Keytracker UK and Eichner (Germany), companies that have agents and distributors throughout the world.

We supply industry with key and asset management systems, from the very basic colour coded plastic key tags, to Workshop/Warehouse management tools and to the more sophisticated Electronic Key and Asset Management systems.

Our clients include companies from the Auto industry, Mining, Real Estate, Government both local and federal, Fleet and long distance carriers, Security, Hospitality and many more. In fact, any company or organization where the management of keys and/or assets is essential to their wellbeing.

What Our Clients Say About Us…

"We are very pleased with the new system, it provides 100% better key management, and is great to identify who has which keys. The service we got from your team was great, they were helpful and took the time to understand what we needed"

Graham Cann, Mechanical Key System.

"Since having the system installed across our sites we have seen a decrease in time spent finding the correct keys for a building or area and have full visibility of who has accessed the keys, at what time and for how long." Andrew Howarth, Electronic Key System.

Index

Car Window Key Box

Effective key management especially for workshops, car dealers, parking services etc.

The KVBOX® is mounted directly on the car window and securely fixed. It also offers space for large car keys. The box is opened by a key that can be used for up to 10 KVBOX®. Push and lock – the locking mechanism already engages when closing the box; no lock required. As the box is waterproof it is suitable for outdoor use.

KEY CABINETS

These secure Key Cabinets are specially designed for large keys and remote key fobs, ideal for today's vehicle keys and multi entrance protection for buildings and other warehouse/workshop areas.

Compact 80 Plus

Executive 200 Plus

No more grappling with keys falling off hooks or crunching into each other when the cabinet is closed. Everything you need for rapid identification of each key with our key tags.

Manufactured from high quality 1.5mm steel with mechanical combination lock and key override, our cabinets now include a fully adjustable Flexible Rail System which allows for quick and easy capacity adjustments.

Proven security with a tried and tested cabinet design with mechanical combination lock and key override as standard. Finished in metallic silver.

The T1 Unit provides a simple solution for storing, securing and keeping track of a single key or tools and other equipment (Drills, Ladders etc.).

Secured using any one of our tamper-proof security seals range, the keys, tools or equipment are locked onto a Retention Peg which is locked onto the T1 unit. Staff must use their unique Access Peg to release the item, which stays locked in its position when the item is removed.

At a glance, management or staff can quickly and easily see which equipment is in use and by whom, whilst ensuring fast return to its correct position. Please refer to the Keytracker Mechanical Key Management system (page 8) to see how this peg-in, peg-out system works.

For heavier items such as tools and drills, ladders etc., a metal cover is provided to support the extra weight of the item.

Product Code	Product Description	Price*
T101	Without metal cover, including Retention Peg, 2 Access Pegs and 5 Anti-tamper Seals.	$29.95
T102	With metal covering, including Retention Peg, 2 Access Pegs and 4 x 180mm steel cables.	$49.95
	*Plus $14.95 p&h, plus GST	

Key Management Made Simple with:

KEY TRACKER®

THE SECURE KEY MANAGEMENT SYSTEM

The KEYTRACKER system is the simplest and most cost effective system currently available for keeping track of where keys are and who is using them. This means saving time, money and minimising frustration.

The KEYTRACKER Key Management system is ideal for businesses where lots of keys are handled by lots of staff, where the incidence of lost keys is high.

It works on the basis of a colour coded identification system where keys are secured to a numbered Retention Peg by an Anti-tamper Seal which is then locked into the board. Keys can only be released from the board with a coloured Access Peg. Each employee has their own Access Peg/s which can be listed on a simple reference sheet and in so doing identifies who has taken the key.

Access & Retention pegs in a wide range of colours

Getting a key is as easy as 1 2 3

1 Insert your personal colour coded access peg...

2 Twist to release the desired key...

3 Remove key! Access peg cannot be removed until key is returned

The Benefits are Simple...

SAVES TIME...

- *No more lost keys*
- *Only authorised staff can access the board*
- *Organised layout – all keys in one place*

SECURITY...

- *Ensures you always know who has the keys*
- *Minimises opportunist theft*
- *Rugged construction deters vandalism*

PRODUCT...

- *Modular system with total flexibility to allow growth*

EXTRAS & SPARES

- Spacer tracks (double board size)
- Stainless Steel 'Holding' bar
- Magnetic Blocks – plain or numbered, in various colours
- Keytracker colour coded padlocks
- Padlock storage bars
- Anti-tamper seals – plain or personalised, in various colours
- Slide off wall mounts
- Mirror Hangers – personalised with your logo, dealers name and contact details
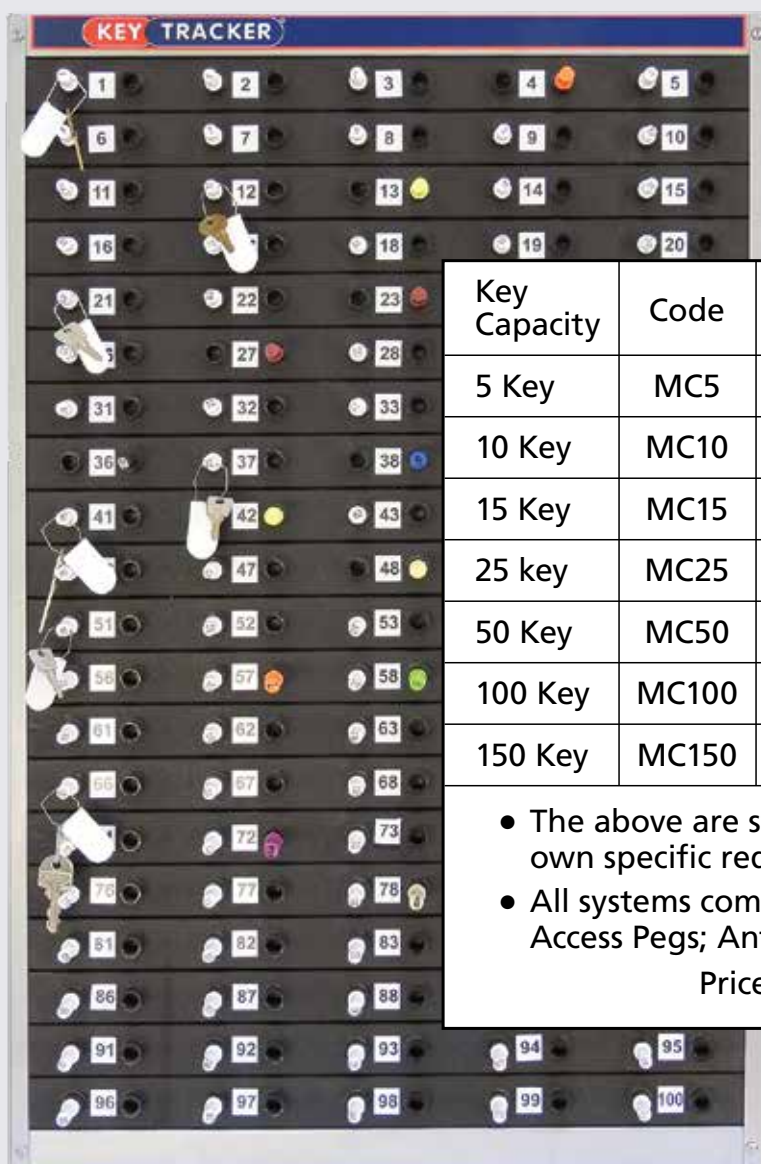

| Key Capacity	Code	Height cm	Depth cm	Width cm	Weight kg	Price
5 Key	MC5	101	70	153	1.36	**$225**
10 Key	MC10	140	101	546	1.72	**$365**

KEY CONTROL SOFTWARE

Multiple users can log into the software through any compatible internet browser from any device, including smartphones and tablets.

Administrators have complete control over individual and group access permissions. You can decide who has access to specific keys or barcoded items. You can even decide what users can do when logged on to the software.

With Key Control Software, you can enjoy greater peace of mind in knowing that your keys can be tracked at any time. You can always know which keys are checked out of a storage box or cabinet and who checked them out.

The software may be used as a standalone product or with any of our other Keytracker systems. Consider combining the software with one of our secure mechanical or electronic key storage options, such as our electronic key cabinets.

Contact us today to enquire about a 30 day no obligation trial.

The Keytracker Mechanical Key Management system (pages 6/7) paired with key tracking software, provides a comprehensive method for managing, tracking and controlling your keys and or assets.

With our web-based software, you can easily track key movements in real-time. Monitor your staff and keys through a simple user interface and avoid the challenges of dealing with a lot of keys.

Our key tracking software is designed to track keys as they are checked in and out of the system, even when taken between sites. You may also use this software to track and manage any barcoded items.

The Magnetic Number Block System is predominantly used by the automotive industry, especially in an often crowded workshop floor, by providing vehicle identification where the number block adheres to the roof's highest visible point.

The system consist of the **Magnetic Number Blocks** which are fitted with powerful magnets inside the fixed rubber base and are numbered to match the **Block Control Board** which keeps track of the Number Blocks when not in use. The Board holds 20 blocks. Number Blocks may be purchased separate from the Block Control Board, come either numbered or blank and in any colour or mix of colours.

The blocks may also be personalised for use in any industry.

Product Name	Product Code	Price
Number Blocks (Plain)	BNBO	**$15.95** each
Number Blocks (Numbered)	BNBN	**$17.95** each
Block Number System (Block Control Board and 20 Number Blocks)	BNBB	**$595.00**
Magnetic Personalised Block (Minimum 20 blocks)	BNBP	$95 one time set-up plus **$19.95** per block
Prices plus $35 shipping, plus GST **To order: Call 1800 814 716 quoting colour/s and block numbers**		

KEY TRACKER®

- *PLAN THE FUTURE*
- *CONTROL THE PRESENT*
- *ANALYSE THE PAST*

Key Management with the **Keytracker** secure solution is designed for the secure control of keys in sensitive and high risk company sectors, using a secure Key Cabinet.

Who has permission to remove which key and when? You decide and can set shift patterns and access times for both users and keys alike. The clever curfew options allow you to set a specific time that a user must return a key or that a key must be returned and it can be configured to notify you by email the moment any of these or many other events occur.

The **Keytracker Electronic Key Management system** can provide the solution to key management in many environments, from Auto Dealers to Marina's…Hotels to Cruise Liners … from Banking to Prisons. In fact anywhere where keys or assets need securing whether a traditional key, or master key for a hotel card system.

Comprehensive reporting gives a complete audit trail of the activity associated with the keys.

| Identify User | Unlock Cabinet | Unlock Key | Log Data |
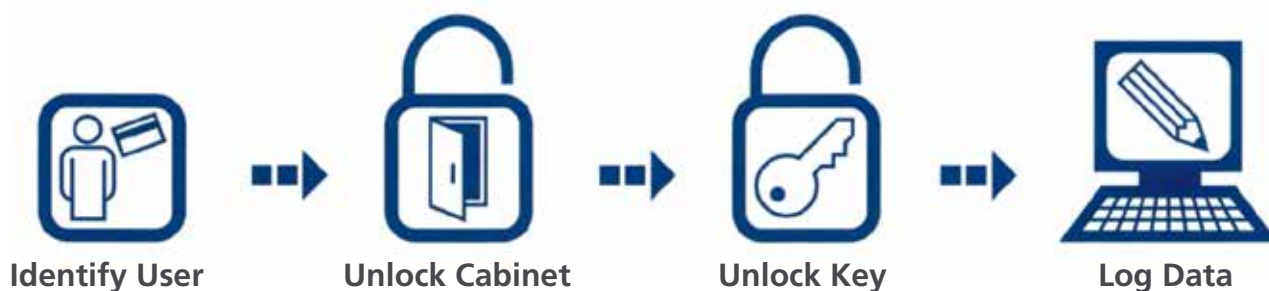

Features

- The software is available for Windows as well as a Web based application. No restrictions to the number of users and no annual licence.

- MSSQL (Standard), Oracle or MySQL may be utilized as an SQL Database

- Access to keys is achieved via PIN, RFiD (various protocols, such as Legic, Mifare, HID) and the newest biometric methods.

- Communication between the Server and the system is by cable or wireless network or phone connections, such as ISDN or GSM.

- Add-on modules allow complete company integration, for example: Booking module, Fleet module etc.

- On request we will gladly integrate our system into your existing structures, from data import/export scripts to the complete control of our system through third-party software by means of a standardized OPC-interface.

Security Features

- Compact solid steel housing with integrated control unit – no open or recessed points of attack.

- Mechanical emergency door release

- Mechanical emergency release for locked slots

- Internal hinges – increased burglary protection

- Bespoke security lock with 2 contacts for 'closed' and 'locked'

- Integrated biometric access control or PIN with RFiD card

- Emergency power supply with Lithium Ion battery and integrated battery charger

- Various optical and acoustic alarm messages are possible onsite and can be reported to the server and sent as emails

- More than 20 alarms can be activated, such as forced door, console open, unauthorized plug withdrawal etc.

- Up to 4 alarm zones can be activated over potential free alarm contacts (output to Security Office or Police and Fire Departments)

- Emergency locks replaceable with advanced security or customer supplied locks

Google Keytracker on YouTube to see a demonstration.

iLockerz

Keytracker electronic lockers and intelligent cabinets, aptly named iLockerz, allow your business to secure, control, track and maximize the use of important equipment.

These innovative systems are available in three configurations:

- Secure intelligent lockers that use RFiD to track and manage the use of shared portable equipment such as laptop loans, radio handset management, drug pack issue and returns, and much, much more.

- Central storage lockers or smart charging stations with electronically operated locker compartments that allow users to store, secure and charge personal devices such as phones, iPads, laptops etc.

- Large storage areas such as workshops, stores, armouries or containers that incorporate RFiD technology to track the movement of users and equipment in and out. Used on building sites, manufacturing, hospitals, military bases and many other large scale operations.

Whether you're from an educational establishment with many iPads and laptops for loan, or part of a works engineering department that is in need of a reliable tool tracking system, trust the iLockerz range of locker systems to maintain security, increase efficiency and improve visitor experience.

Features include:

- 2mm thick steel security housing
- HD colour photo of each transaction
- Emergency manual key override
- Emergency battery back-up
- Pin code, card swipe or fingerprint access
- Access control system integration
- RFiD tags to suit all types of equipment
- Web based asset reservation module
- Stand alone or fully networked configuration
- In-built web software with Wi-Fi connectivity
- Remote access and locker release vis software
- Comprehensive audit trail of system usage
- Wide range of in-built power and charging points
- Laptop loan locker compartments also available

How does it work?

iLockerz RFiD enabled lockers and cabinets allows the business to securely and effectively manage the assets, objects and equipment that is vital to its effective operation.

They are accessed by entering a pin code into the touch screen control panel or by swiping the Reader. The software then scans the in-built database to establish the permission rights of the individual.

On retrieval, a unique time and date stamp is recorded alongside a colour photograph of the user that was granted access. Through the use of pioneering RFiD technology, *iLockerz* also recognizes each of the assets individually, therefore logging those that leave against the user's account.

The information is stored and may be retrieved at any time remotely over Wi-Fi, through the internal LAN network or via the touch screen control panel.
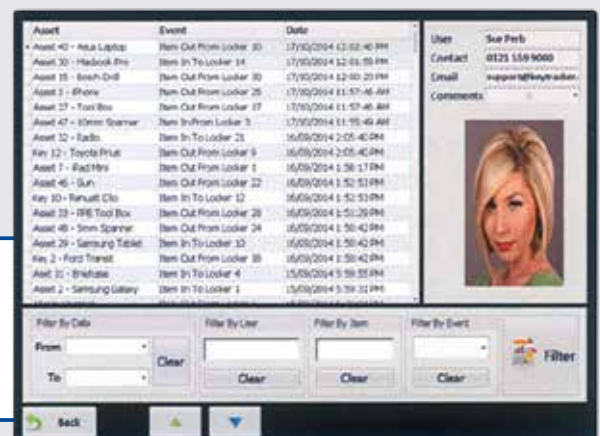

1 User logs into iLockerz with pin code, card swipe or fingerprint.

2a Either – User may request the use of equipment via asset search or locker selection.

2b Or – User may return assets via rapid return menu or by highlighting a specific locker.

3 An audit trail is automatically recorded and may be integrated via the touch screen control panel or web software.

KEY DROP BOX (LARGE)

Here's a secure way of letting clients drop off vehicles outside working hours and leave the keys with you. Mounted through an external wall with a weatherproof flap, the steel DROP BOX has a lockable internal door so that only approved access to the keys is allowed. Multiple baffles prevent fishing out keys from the outside.

- **Tough, steel construction**
- **Weatherproof external flap**
- **Multiple baffles to prevent fishing**
- **Lockable internal access door**
- **W: 25cm, D: 25cm, H: 75cm**
- **Suitable for wall thickness up to 30cm**

Product Code: DB01
Price: **$995** plus $35 shipping, plus GST

KEY DROP BOX (SMALL)

There are 3 versions available, 2 that can be affixed to either a right hand or left hand wall, the third that can be mounted through a wall.

These Key Drop Boxes provide total security for your customers who want to drop off their keys or key cards after hours. The safe is made of high quality carbon steel with an 8 mm thick door. They hold cards/keys up to 125 x 61 x 43mm in size and no key removal is possible even with the 'Roll Bug' open. The Roll Bug closes automatically after use. Fitting instructions and 2 double bit keys included. Colour light grey.

The ideal wall width for the 'through the wall' box is 14 to 50 cm, but it is also possible to install on thinner or thicker walls.

Product Code	Description	Dimensions	Weight	Price*

Back view with whiteboard
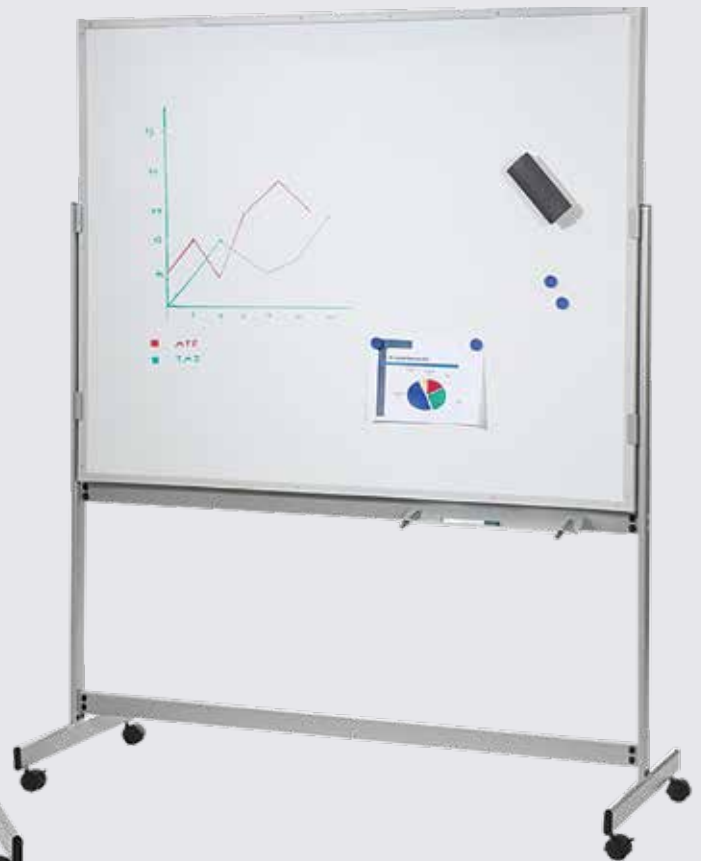

MOBILE PLANNING BOARD

A freestanding mobile planning board with whiteboard on the reverse for use as a workshop planner as well as for the presentation of drawings, diagrams etc.

The ideal solution when it comes to mobile planning. Equipped with 9 sliding rails and individual labelling options as well as a storage tray for pens and eraser. The back whiteboard on the reverse is magnetic and writable with conventional board markers. Accommodates A4 Service Boards with dimension of 1550 x 1945mm.

The frame is a stable oval tube steel 60 x 20mm with 4 double rollers, 2 lockable. Silver coloured powder coated.

Product Code: WPL06/M
$2215 (incl. shipping), plus GST

Our Service boards, made of 2mm thick PVC with job bags made of high-strength transparent film are robust and stable, thanks to a novel fold-over welding to keep all working papers enclosed.
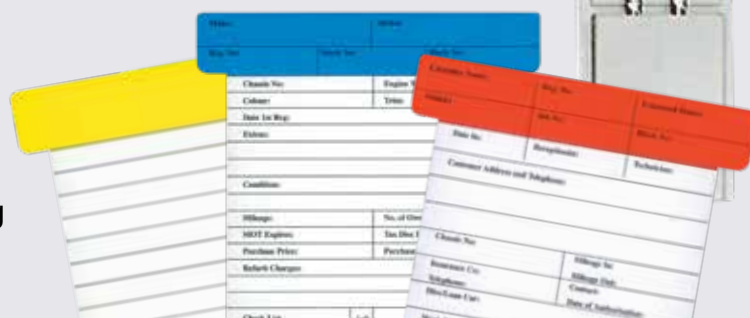

See page 26 for details.

VISUAL PLANNER

Ideal for planning jobs with clear, concise information on pre-printed cards. Designed for the automotive industry, our large cards are ideal for at-a-glance assessment of job loadings, stocktaking and a whole lot more.

ADDITIONAL MODULAR STRIP

Just fit an additional module to the wall alongside your Starter Kit, giving instant extra capacity.

- Starter kit has 4 modules (as shown) each holding up to 30 pre-printed VP-cards.
- Includes FREE pack of 200 VP-cards and headers (packed in 100's). Three colours available.
- 66 headings supplied to suit all departments.
- Storage pocket on each module for cards and pens.
- Easy-clean grey satin plastic finish.
- Planning board dimensions – height 77cm, width 46cm.
- Large cards (15cm x 10.5cm).
